

LOCATION: HAMPDEN PARK STATION, EAST SUSSEX

DESCRIPTION:

HAMPDEN PARK DOWN PLATFORM RECONSTRUCTION

THE WORKS:

Reconstruction of the down platform involving the replacement of the existing bull nose brick copers.

The raising of the platform riser throughout it's length by an average of two courses using brick/concrete blocks.

Installation of offset stud buff coloured tactile paviers.

The resurfacing of the platform ensuring the correct cross falls with coated macadam dense heavy duty and high modular binder course aggregate.

Installation of heavy-duty drainage channels with boltless locking grates.
