

LOCATION: CHAFFORD HUNDRED STATION

DESCRIPTION: STATION REFURBISHMENT

**THE WORKS:**

The works involved minor demolition of some elements of the Station buildings to enable improvement works to take place. Construction of new pedestrian ramps along with associated stairs (as per above photos), retaining walls and railings. The works also involved the relocation of passenger gates within the station building plus the installation of an additional gate. New doors and windows were also constructed and floor and wall finishes both external and internal were replaced. Finally the existing platform shelter was extended.
